SAFETY INSTRUCTIONS

Carefully read the instructions before operating the unit.
Please retain this manual for future reference.

Important: This product is intended for domestic and light office use **ONLY** and not for commercial, industrial or outdoor use. When using electrical appliances, basic safety precautions should always be followed:

1. All electrical repairs must be carried out by a qualified electrician. Inadequate repairs may result in a major source of danger for the user and invalidate the warranty.
2. Do not operate the unit if the plug or cord is damaged, after it malfunctions or has been dropped or damaged in any way, it must be repaired by a qualified electrician.
3. Do not use the heating function if the fan is broken.
4. Use of an extension cord is not recommended with this product.
5. This unit should only be used by adults.
6. Keep the unit and its cord out of reach of children.
7. Children shall not play with the appliance.
8. Cleaning and user maintenance shall not be made by children.
9. The unit should not be used by persons with reduced physical, sensory or mental capabilities.
10. It is not recommended to place this appliance in cupboards, closets, boats, caravans or similar locations.

11. Do not use the unit in a wet room, such as a bathroom or laundry room or in areas where the unit is likely to get splashed.
12. Do not place the unit directly underneath a wall socket when in using Heat Modes.
13. Always place unit on a dry and stable surface.
14. Keep unit at least 1 metre away from TV's and Radio's to prevent interference.
15. Do not cover or obstruct the unit's filter or louvres.
16. Do not insert fingers, pencils or any other objects into the air inlets or outlets of the unit.
17. Do not let chemical substances come into contact with the appliance.
18. It is not recommended to use flammable substances or vapours such as alcohol, insecticides, petrol, etc. whilst the unit is in use.
19. Do not clean the unit by spraying it or immersing in water.
20. Do not unplug the unit while it is working, this could damage the electronic circuits. Always use the control panel to start and stop the unit.
21. Always turn the unit off when not in use by removing the plug from the wall socket; ensuring to pull the plug top and not the cord. Always turn off the unit before cleaning, carrying out maintenance or moving location.
22. Do not pull or place the electrical cable near a source of heat: always unroll it completely to avoid dangerous overheating.
23. The filter must be used with the product at all times, when removing it for clearing always turn the unit off and unplug from the mains wall socket.
24. Always turn off unit, unplug and empty the water tank before placing into storage for a long period of time.

TECHNICAL SPECIFICATION

Model	IG9704
Cooling Rated Power	70W
Heating Rated Power	2000W
Ioniser Function	Yes
Humidifier Function	Yes
Air Flow Volume (m³/h)	300 m³/h
Power Supply	220-240V~ / 50Hz
Fan Speeds	3
Heat Settings	2
Water Tank Capacity (Litre)	5
Timer	7.5 Hour
Net Weight (Kg)	7.5
Product Dimensions (H x W x D) mm	657 x 250 x 336 mm

APPLIANCE OVERVIEW

1. Control Panel	9. Water Tank Handle
2. Vertical Louvres	10. Power Switch
3. Water Level Indicator	11. Filter / Release Clips
4. Caster Wheels	12. Cord Storage Bracket
5. Heating /Cooling Selector Dial	13. Drainage plug (Inside tank)
6. Handle	14. Water Tank
7. Horizontal Louvres	15. Ice Packs
8. Power Cord	

Stability Brackets

For added Safety, this appliance is provided with stability brackets to ensure it cannot be knocked over easily. It is highly recommended that the stability brackets are installed whenever the appliance is in use.

How to Install Brackets

1. The stability brackets are stored within the water tank. Slide open the water tank and remove the brackets

2. Place the brackets on the floor, aligning them to the width of the castor wheels

3. Lift the appliance and then gently lower onto the brackets, ensuring the pins fit into the slots in the base

OPERATING INSTRUCTIONS

Control Panel

1. Dual function button: Mode or Heat

2. Oscillation button

3. Ioniser button

4. Timer button

5. Empty Tank Indicator

6. On/Off button

7. Cooling/Humidifier button

8. Fan Speed button

This appliance is a 4 in 1 unit with Cooling, Heating, Ioniser and humidifier functions.

Remote Control

Requires 2 x AAA batteries (not included)

Turning On

- Once the appliance has been located in an appropriate location, plug into a wall socket and then switch on the power switch located at the side of the appliance - the appliance will beep once and remain in stand-by status.
- You will need to use the dial located on the side of the appliance to choose Cooling or Heating

Operation

Note: The selected function of the dial is directly linked to the Mode/Heat button.

- When the dial is on Cooling, the Mode/Heat button operates the Sleep, Natural and Normal modes.
- When the dial is on Heat, the Mode/Heat button operates the High, Low heating power.

Cooling

- Select dial to Cooling
- Open the water tank drawer
- Add cold clean water into the water tank – maximum of 5 Litres, and then close water tank drawer.
- Observe the Water Level window located at the front of the appliance, ensuring that water volume is between MIN and MAX
- To achieve additional cooling, you can add frozen ice blocks or ice cubes into the water tank. You can use either you own ice blocks or those provided. Those provided will require filling two thirds with water and frozen prior to use. It is advisable to place ice blocks and/or ice cubes in the water tank, prior to filling with water, to ensure the MAX water level is not exceeded.
- Press the On/Off button and the mode will automatically select normal mode and the fan speed will operate at high speed
- Press the Cool/Hum. button
- The appliance will cool and humidify the room
- If the water tank is empty, the Empty Tank indicator on the control panel will blink, alerting you to refill the tank
- To turn off the appliance, press the On/Off button on the control panel and then switch off the power switch located at the side of the appliance

Note: The appliance can also operate as a Fan, if the Cool/Hum. button is switched off and the water tank is empty.

Air Flow

- Press Fan Speed button to select the desired speed, choosing from High, Medium or Low.
- Press the Oscillation button to oscillate the vertical louvres from left to right
- You can manually adjust the horizontal louvres up or down providing complete air flow control

Modes

- **Sleep Mode:** The appliance will perform the following sequence:
 - High fan speed 30 minutes —> Mid fan speed 30 minutes —> keep Low fan speed
- **Natural mode:** The appliance will run through a repeated cycle sequence of:
 - Low fan speed 10 Seconds —> High fan speed 5 Seconds —> Mid fan speed 5 Seconds —> Low fan speed 10 Seconds —> Stop 5 Seconds —> Mid fan speed 15 Seconds —> Low fan speed 5 Seconds —> Stop 10 Seconds —> [cycle repeats]

Note: These modes can operate when using the Fan, Cooling/Hum and Ioniser Functions

Heating

Note: Ensure the water tank is empty – Please refer to Cleaning and Maintenance section on page 7 for details on how to empty the water tank

- Select dial to Heat
- Press the On/Off button and the heat will automatically select low heat and the fan speed will operate at medium speed
- Press Heat button to select required heat level
 - Low = 1000W
 - High = 2000W
- Press Speed button to select required fan speed

Note: You can only select Medium or Low Speed when appliance is operating as a Heater

- To turn off the appliance, press the On/Off button on the control panel, the fan will continue to run for approximately 30-60 seconds without heat to cool down, then switch off the power switch located at the side of the appliance.

Timer: The timer will switch off the appliance after a desired period of time; it can be set between 30 minutes to 7 hours and 30 minutes by increments of half an hour.

- There are four positions with indicator lights
 - 0.5H = Half an hour
 - 1H = One Hour
 - 2H = Two Hour
 - 4H = Four Hour
- Press Timer button to select desired period of time
- The appliance will automatically switch off at the end of the selected period

Note: If the timer button is not used, the appliance will continue to operate until manually switched off.

Ioniser: The Ioniser function removes dust particles and neutralises unpleasant odours

- Press the Ioniser button to turn on this function and the indicator light will illuminate
- Press the Ioniser button again to turn off this function and the indicator light will switch off

CLEANING AND MAINTENANCE

Turn off the unit and unplug from the mains socket before cleaning or performing any maintenance.

Cleaning the Exterior

- Clean the plastic housing with a duster or a soft damp cloth. Do not use chemical or abrasive cleaners to clean the exterior of the unit to prevent damage to the finish

Cleaning the Filter

- It is recommended that the air filter is cleaned every 4 weeks. If the air filter is blocked with dust, the unit's performance will be significantly affected.
- Located at the top of the filter, you will notice two release clips; Pull the clips gently towards you and then lift upwards to release the filter from the appliance
- Use a vacuum cleaner or tap the filter lightly to remove loose dust and dirt. If necessary you can wash the filter by immersing them in lukewarm water with a neutral detergent.

Note: Extreme care should be taken when cleaning the filters as they are very delicate.

- Gentle rinse and then dry thoroughly before re-installing the filter

Important: Do not run the unit without filter

To Empty the Water Tank

- Switch off and unplug the appliance from the power socket
- Move the appliance to a suitable location near to a sink or drainage point
- Gently slide the water tank drawer out of the back of the appliance
- Place a suitably sized container underneath the drainage plug of the water tank
- Remove the drainage plug and drain the tank completely, use a dry cloth to wipe away any excess water which is hard to drain from the tank
- Re-install the drainage plug and slide water tank drawer back into the appliance

End of Season Maintenance

- Ensure that the Water Tank is empty – following the instructions above
- Clean the filter
- To protect the unit against dust, cover and store in a dry place, not accessible by children

TROUBLE SHOOTING GUIDE

If you experience difficulties with the appliance, please check the suggestions below before contacting customer services:

Problem	Solution
The unit will not switch on	• Check Trip Switch / Fuse • Check if the plug is connected to mains socket correctly • Check batteries in the remote control
Runs for a short while and then switches off	• Check if air outlet is blocked, if so remove obstacle • Check if Timer function has been activated
The unit has been running for a long period and then switches off	• The overheat protection has been activated to protect the motor – turn unit off for a least 10 minutes and then switch back on
Runs without cooling in Cool/Hum. mode and Empty Tank Indicator blinking	• The water tank is empty and needs to be re-filled • Check if the air filter is dirty – if so, clean • Check if air outlets or inlets are blocked
Water is leaking from unit when moving	• Drain the water tank – refer to Cleaning and Maintenance on Page 7 • Ensure rubber drainage plug is securely fitted in water tank • Ensure unit is located on a flat and even surface

MAINS PLUG FUSE REPLACEMENT

Fuse Replacement (Class II)

Remove the fuse cover with a small flat head screw driver. Take out the fuse and replace with a new fuse of the same Amp. Replace the fuse cover and push back into place.

DISPOSAL INFORMATION

The European Directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in normal unsorted municipal waste.

Old appliances must be collected separately in order to optimise the recovery and recycling of the materials they contain and reduce the impact on human health and the environment.

The crossed out “wheeled bin” symbol on the product reminds you of your obligation, that when you dispose of the appliance it must be separately collected. Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

Igenix Warranty Terms & Conditions

This product is guaranteed for a period of 12 months as standard from the date of purchase against mechanical and electrical defects. You can extend your warranty for a further 12 months by registering your product.

Upon registration we will cover your product for a period of 24 months from the original purchase date against any mechanical or electrical defects.

To qualify for the guarantee, the product must be used for domestic household use only and in accordance with the instructions in the user manual. Any misuse of the product will result in the warranty being void.

The guarantee does not cover accidental damage, misuse, neglect, tampering or incorrect adjustment or installation.

The guarantee will be rendered invalid if the product is resold, has had its serial number removed (or has an invalid serial number), or if an unauthorised person has carried out any repairs or alterations.

The warranty does not cover accessories or consumable parts that require replacement under normal use. This includes shelving, dials, filters, belts and trays etc.

In the unlikely event of a breakdown please refer to the Troubleshooting guide in your user manual and check all plugs, fuses and the electricity supply.

If you still require assistance please contact our Customer Service department on **01473 271 272** or write to us at the following address:

Customer Service Department
38 Bluestem Road, Ransomes Europark
Ipswich, IP3 9RR

Please quote the Product Code which begins 'IG' or 'DF' and the Batch Code beginning '5' and give details of the exact fault. We will then decide whether to repair or replace the item.

Before we arrange the repair or replacement you will be required to return a copy of your proof of purchase. Please retain your original.

If an item is replaced within the agreed guarantee period, the guarantee for the replacement item will be calculated from the purchase date of the original.

In the event that the product is inspected and no fault is found or the product is not within the guarantee period you will be charged for the repair and any carriage costs.

Thank you for choosing Igenix

As a valued customer we would like to offer you a FREE 2 year warranty to cover your product against any electrical or mechanical defects.

This means that in the unlikely event you develop a fault or problem with your product we will happily repair or replace the item free of charge.

To qualify for the 2 year warranty you must register your product within 30 days of purchase. The full Terms & Conditions of our warranty policy are shown on the opposite page. They are also available on our website. **www.igenix.co.uk**

To register your product, please complete all sections of the form below and return to us at the following address: Igenix, 38 Bluestem Road, Ransomes Europark, Ipswich, IP3 9RR.

Alternatively you can visit the Igenix website and complete the form online.
